

Product Description

The Hypar Umbrella has a hyperbolic-shaped canopy. This unique shape is achieved by using two low attachment points and two high attachment points for the shade's fabric. The shade's profile is slim with fewer visual obstructions than a regular umbrella. What's more, it has a look similar to popular shade sails.

This shade umbrella is available in our Dual Color Shade Fabric. This fabric combines two unique colored fabric yarns to create a two-tone fabric with an impressive shimmery effect.

Standard Features

8 ft., 10 ft., 12 ft. Entry Heights
Surface or In-Ground Mount
With or Without Glide Elbow™
Traditional Shade Fabric, Dual Color Shade Fabric
Size Minimum: 10'
Size Maximum: 27'

20-Year Warranty on Framework

10-Year Warranty on Fabric

Custom Options

Custom sizes are available from 10 ft. to 27 ft.

Custom entry heights are available from 8 ft. to 20 ft.

Coastal or Northern Customers:

For customers in coastal areas or northern climates, we recommend adding our optional Glide Elbow™ fabric tensioning accessory. Not only does this accessory makes it easier to install and tension your fabric, but it also makes it easier to remove the fabric in the event of bad weather. Remove fabric before bad weather, such as heavy snow or hurricanes, to protect the shade's fabric and frame. Our frames are rated for wind gusts up to 150 mph when the shade's fabric is removed.
