

Deluxe Weather Station

Name

Deluxe Weather Station

Description

Our Weather Station is available in two different designs: basic (49026) and deluxe (DRM00073XX). Designs are also available with an attached deck. The Basic Preschool Weather Station features a thermometer and interactive knobs that showcase images such as snow, rain, and cloudy weather. Children can move the interactive knobs to indicate today's forecast. The Basic Preschool Weather Station is a great tool for an outdoor classroom and for students in grades who are learning about weather.

The Deluxe Pre-School Weather Station includes a rain gauge, wind gauge, forecast spinner, and temperate knob. Each feature is interactive and allows the child to determine the day's weather.
